## **INTRODUCTION**

Indian youth are our strength. However, a challenge facing the country is that of skilling our youth as per the demands of the industry. Recognizing the need for quickly coordinating the Skill Development and Entrepreneurship efforts of all concerned stakeholders, the Government of India created the Ministry of Skill Development and Entrepreneurship on 9th November, 2014. To create further convergence between the vocational training system through Industrial Training Institutes (ITI) and the new skill initiatives of the government, the training and apprenticeship training divisions from the directorate general of employment and training (DGET) under the Ministry of Labour and Employment stand transferred to the Ministry of Skill Development and Entrepreneurship (MSDE) with effect from 16th April, 2015. This move brings over 11,000 ITI's and scores of other institutions, and the apprenticeship and training divisions, under the ministry. The Ministry of Skill Development and Entrepreneurship is an apex organization for the development and coordination of the vocational training including women's vocational training in our country. The ministry conducts the vocational training programmes through the craftsmen training scheme (CTS), apprenticeship training scheme (ATS), modular employable scheme (MES) under the skill development initiative (SDI) scheme, and craftsmen instructor training scheme (CITS) to cater the needs of different segments of the labour market. The national council for vocational training (NCVT) acts as a central agency to advise Government of India in framing the training policy and coordinating vocational training throughout India. The day-to-day administration of the ITI rests with the state governments/ union territories.

Training courses under the CTS is being offered through a network of more than 11,000 government and private Industrial Training Institutes(ITI) located all over the country with a total seating capacity of more than 16 lakhs with an objective to provide skilled workforce to the industry in 126 trades. Skill development courses exclusively for women are also being offered under CTS and other schemes through government and private ITI and Regional Vocational Training Institutes (RVTI) for women.

The apprentices act, 1961 was enacted with the objective of regulating the program of apprenticeship training in the industry by utilizing the facilities available within for imparting on-the-job training. The act makes it obligatory for employers in specified industries to engage apprentices in designated trades to impart on the job training for school leavers, and it passed out to develop skilled manpower for the industry.

The Ministry is implementing the employable scheme (MES) under the skill development initiative scheme to provide vocational training to people to develop skilled manpower for the industry through a network of Vocational Training Providers (VPTS) located across the country. Central Staff Training And Research Institute (CSTARI), Kolkata is the nodal institute for the development/revision of curricula under all vocational training schemes of the ministry.

National Instructional Media Institute (NIMI), Chennai is to make available instructional material in various trades for the use of trainees and trainers to ensure overall improvement in the standard of institutional training under the CTS and ATS schemes.

The National Skills Qualification Framework (NSQF), published in the gazette of India on 27<sup>th</sup> December, 2013, is a national framework that aims to integrate general and vocational streams of education and training. The main goal of the NSQF is to focus on competency-based qualifications, which in turn facilitate and enhance transparency, both within and between general and vocational streams.

## DIRECTORATE OF VOCATIONAL EDUCATION & TRAINING ( GOVT OF MAHARASHTRA )

Directorate Of Vocational Education & Training, Mumbai is committed to provide quality administration and vocational education and training services to educational institutes, Industrial training institutes and NGOs in Maharashtra State to meet the needs of industry, business to service sector and society at large.

Encouraging institutes for developing human resources to reduce the mismatch between demand and supply of manpower in various sectors like Engineering, Information Technology, Agriculture, Paramedical, Home Science, Trade & Commerce.

*“ Millions and Millions of Indian youth should go for acquisition of skills and there should be a network across the country for this and not the archaic systems. They should acquire the skills which could contribute towards making India a modern country. Whenever they go to any country in the world, their skills must be appreciated.”*
